This event is part of our monthly

SENIOR CARE INSIGHTS

CONTINUING EDUCATION SERIES

Social Workers & Nurses - Earn 1 HOUR FREE CEU Credit!

Older adults often face mounting physical and emotional challenges brought on by the aging process that can result in challenging geriatric behaviors. **Case managers, social workers, and nurses who regularly interact with this population experience these behaviors first-hand** when aggression, agitation, refusal of food or water, wandering, and inappropriate sexual advances brought on by depression, anxiety, and dementia culminate in potentially damaging interactions and encounters. Being equipped with new tools and approaches to handle these behaviors can make all the difference for those serving seniors.

In this interactive and practical session, participants will learn how to:

- Determine the best interventions for specific behaviors
- Identify differences between delirium, dementia & depression in seniors
- Work with family caregivers to empower them with the best information

Wed., Jan. 30

11:30am – 1:00pm

Hilton Garden Inn

Eden Prairie

6330 Point Chase

Eden Prairie, MN 55344

Lunch Included!

About the Presenter...

Steven Atkinson, PA-C, MS, Administrator & Lead Provider, Twin Cities Physicians

Steven Atkinson is a Board Certified Physician Assistant specializing in Geriatric Internal Medicine involved in medicine since 1988. As the Administrator and lead provider for Twin Cities Physicians, a growing on-site primary care team of providers who serves residents of senior communities throughout the Twin Cities and southern MN, he is a well-respected expert in providing primary care for seniors. Steven is a dynamic speaker lecturing both nationally and internationally, and a published author in the area of Geriatric Pharmacology. He enjoys working with the elderly and considers it his "passion" in life.
